1. If the form below gets submitted, how can you output the value from the "fname" field in test.php?

```
<form action="test.php" method="get">
First Name: <input type="text" name="fname">
</form>
```

2. What is the correct output of the given code snippets in PHP?

```php
<?php
$NUM1 = 75;
$NUM2 = 25;
$NUM3 = 0;
function sum()
{
    $NUM1 = 10;
    $NUM2 = 20;
    $GLOBALS['NUM3'] = $GLOBALS['NUM1'] + $GLOBALS['NUM2'];
    $NUM3 = $NUM1 + $NUM2;
    echo $NUM3 . " ";
}
sum();
echo $NUM3 . " ";
?>
```

3. Assume we have a file named "assignment1.txt", write the correct syntax to read the file content and display.

4. Write the correct syntax to open the *assignment1.txt* file, and output one character at the time, until end-of-file.

5. What is the directive that is used to enable/disable file uploading in the "php.ini" file?
